He has the splendid audacity to make official reports which advocate "one-ceut letter postage, three cent telephone messages, and ten-cent telegraph messages as near possibilities under an enlightened and compact pos-tal system." He argues strenuously for postal savings banks, is extending the free-delivery system everywhere, is in-creasing the money-order offices by many thousands, and is working with might and main for a score of great postal reforms which, taken together, would be of immensurable benefit to the people ecially in the rural districts, and ich, when fairly presented and under stood, must arouse a popular enthusiasm that no opposition can withstand.
